

SCORPION Rally

Product presentation (maximum 100 words) – 30 words

SPECIFICALLY FOR DESERT RACING AND RALLIES. A carcass developed to offer high resistance, to work in enduro competitions and to respond effectively in overcoming obstacles. Optimised distribution of blocks to ensure effective braking. Designed for those capable of riding even on unexplored ground, irrespective of the type of surface and weather conditions. A specific compound to resist tears, cuts, abrasion and wear.

Application

Vehicles

Description of application (maximum 70 words)

Off-road

Product Features (maximum 70 words)

Compounds tested in the most severe rally raids in the world to ensure high resistance to wear and stable performance even over the longest stretches. Patented reinforced carcass structure for greater traction on all types of ground in any condition of temperature and speed. Optimised block layout for high directional capacity of the front tyre and effective traction on the rears.
